Speed TORA I

- Andrew Alaniz *On minimal wildly ramified geometric local Langlands parameters*

- Chary Addanki *On signs of eigenvalues of Ikeda lifts*

- Giancarlo Castellano *Special values of Rankin-Selberg automorphic L-functions for $GL_n \times GL_m$ over totally real fields*

- Holly Paige Chaos *Weierstrass Points on Shimura Curves*

- Brian Grove *The Explicit Hypergeometric Modularity Method*

- Kimball Martin *Counting newforms by rationality field*

- Finn McGlade *Determination of D_4 Modular Forms by Slice Primitive Fourier Coefficients*

- Alexis Newton *Quartic torsion and quartic points on some rank 0 modular curves*

- Zhining Wei *The refined strong multiplicity one for paramodular groups*
